

CERTIFICATION OF EVALUATION

for

RANDOM NUMBER GENERATOR & ASSOCIATED COMPONENTS (Selective component evaluation)

Random number generator

The random number generator (RNG), scaling, mapping, and shuffling algorithms used to create outcomes for casino games are components of Bodog Casino gaming system. The RNG and related components have been evaluated by Gaming Associates.

The evaluation comprising statistical testing and code inspection found that:

- ♣ the RNG generated results which were uniformly distributed and statistically independent;
- ♣ game symbols for the following games representing different groups of casino games offered by Bodog Casino were fair and not predictable:
 - ◆ Outta This World (AU Slot game)
 - ◆ 7s and Stripes (Slot game)
 - ◆ Baccarat (Table/card game)
 - ◆ Caribbean Stud Poker (Table/card game)
 - ◆ War (Table/card game)
 - ◆ Roulette (Table game)
 - ◆ Bonus Bingo
 - ◆ Keno

The Bodog Casino RNG software has been fingerprinted to enable on-going verification that the RNG in use is identical to the RNG evaluated. The RNG software is verified against the fingerprint periodically.

The current validity of this certificate may be verified by viewing the original at:

Disclaimer

Gaming Associates has conducted a level of evaluation, which has historically been adequate for a limited component evaluation of this type. However, inherent in testing in laboratory environment is the unavoidable limitation of it not being possible to verify the effects of all possible configurations that occur at the actual site.
